- Architected a hybrid on-chain/off-chain backend for a decentralized event management platform.
- Developed and deployed Solidity smart contracts using Truffle to manage event creation and ticket verification on a Ganache local blockchain.
- Built a Node.js RESTful API to handle off-chain data (user profiles, event metadata) in MongoDB and to interact with the deployed smart contracts via Web3.js.
- Engineered secure off-chain user authentication using JWT for profile management, complementing on-chain wallet interactions.

Evently - Mobile Application (iOS)

- **Tech Stack:** Swift, SwiftUI, URL-Session for API consumption
 - Designed and built a native iOS application for the Evently platform, providing a seamless and responsive user experience.
 - Integrated the backend API to fetch and display event data, manage user sessions, and handle event registrations.
